

Introduction to Building Information Modelling and Digital Delivery Essentials

Given the implications of industry 4.0 and the need for digital skills in the construction industry, there is an urgent need to train and prepare built environment professionals and engineering students to equip them with digital skills, that have now become critical to infrastructure delivery. The need for improvement in infrastructure delivery efficiency, effectiveness, value for money and sustainability requirements, and due to pressures imposed by new project complexities and the changing industry skills needs, industry stakeholders are increasingly demanding competency and capability in building information modelling and infrastructure digital twinning.

PROGRAMME DETAILS

Duration: Semester 1 and 2

Venue: Online

METHODS OF ASSESSMENT

An online written assessment and a group case study

ENQUIRIES

carinbe@uj.ac.za or 011 559

6655/6417
