

Advanced Construction Health & Safety Management

Rationale for offering this Short Learning Programme:

The purpose of the Advanced Construction Health and Safety Management SLP is to develop students with the in-depth skills required for planning and managing construction health and safety, such that as built environment professionals, they may be able to satisfy the legislative obligations when implementing health and safety measures. The SLP will appeal to engineering and built environment professionals, students with a 3-year undergraduate qualification in the built environment or related courses and those in the occupational health and safety field.

Duration: Semester 1/2

Venue: UJ DFC/Online

Fee: R16 000.00 per Student

METHODS OF ASSESSMENT

An online written assessment and a group case study compilation
